

Sherwood KVAB Series Post Medical Valves

Strong, durable brass body made from extruded brass rod will fit all yokes made to CGA 860 drawing specifications with protective chrome finish.

- All valves MRI compatible approved to 3 Tesla
- Durable lower plug made of tough naval brass resists wear
- Nominal stroke is 1.5 turns. Full flow at one-third turn
- Chamber design minimizes risk of broken stems caused by careless handling of cylinders
- Pressure relief device is a single unit to ensure proper assembly and to resist tampering
- Inert Teflon packing provides leak-free stem seal, long cycle life and is resistance to corrosion
- Available in wrench, toggle, or handwheel type
- Precise, quality machining results in exceptional finishes for low torque sealing and long packing life
- Secondary O-ring helps to provide a secure seal under vacuum purging and low pressure operation
- Copper sealing gasket provides permanent, leak-resistant bonnet seal
- Oxygen cleaned with aqueous detergent to CGA Specification G4.1
